melt,

how to discover your size?

confirm the size of the print

bar in millimeters:

the ring measurements are very precise. please carefully follow these instructions to obtain an accurate measurement:

1) before printing, make sure the page setup is set to A4 so that the ring pattern matches the actual size.

2) measure the bar on the card; it should measure exactly 50 mm in length.

measure your ring

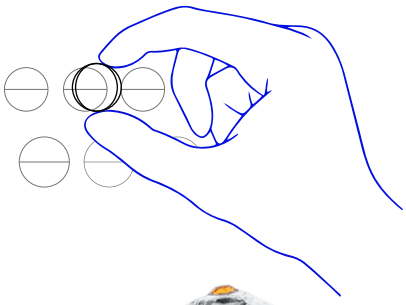
steps:

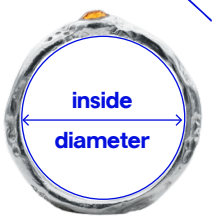
1) choose a ring that fits your finger properly.

2) place the ring over the circles on the guide and find the one that best matches its size. the inner edge of the ring should align with the circle's edge, leaving the outline visible. if the ring completely covers the circle, that size is too small for you: try the next one.

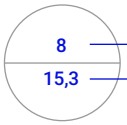
3) this measurement refers to the inner diameter of the ring.

4) if your ring size falls between two sizes, we recommend choosing the larger size.





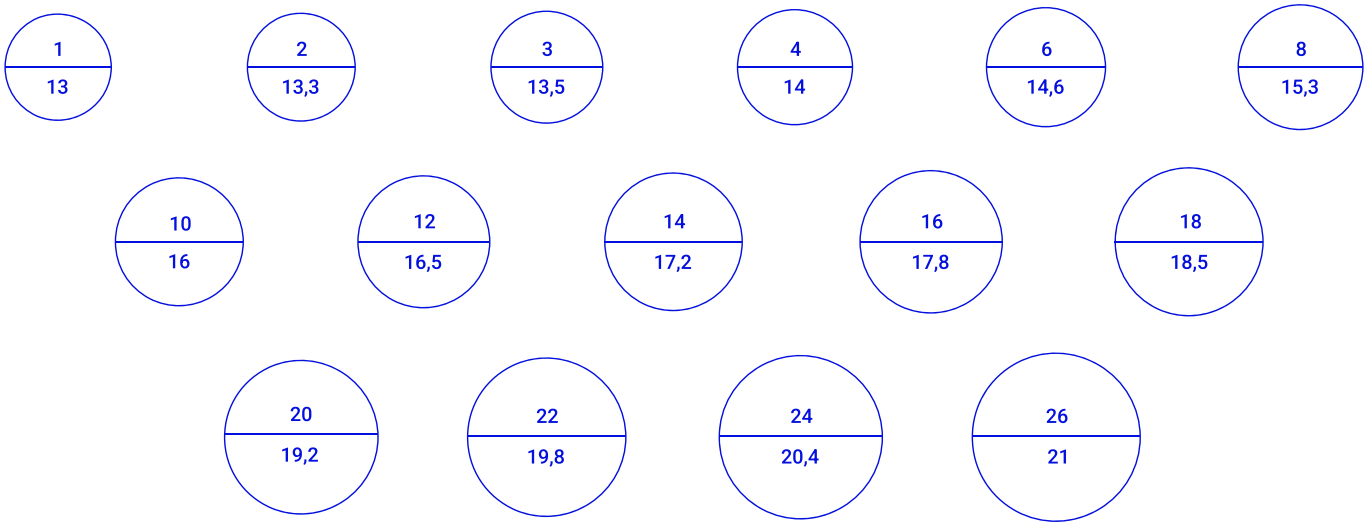
the ring sizes below are in spanish sizing.



→ spanish size 8

→ inside diameter: 15.3 mm

the sizes match the inside edge of the ring



your size doesn't appear on this guide? if you know your size and it's an odd number, write to us: we make rings in custom sizes.
